

ROI Print Manager Feature Matrix

The following tables outline the key features of ROI Print Manager. For more information please contact us at 602-788-1313 or email sales@roiprintmanager.com

USAGE TRACKING & REPORTING
• Tracks all local USB printing, network printer and MFP usage, including copy, scan and fax
• Wide range of standard report templates out-the-box. Over 100 report types available covering usage & cost savings
• Tracks usage by user, group, department, device, location and more...
• Schedule and distribute reports by email
• View reports online as PDF, or convert and export data in multiple formats including XML, CSV & Microsoft Excel

RULES-BASED PRINTING
• Control user access to color for print & copy
• Set print policies such as force duplex or print quality
• Set minimum and maximum page thresholds by print device or device type
• Enforce print policies by application type
• Set print and copy quotas by user, group or cost account
• Easily create and deploy any print rule through a powerful scripting engine

AUTHENTICATION
• Full Single Sign-On (SSO) with all native MFP apps and compliant 3rd Party solutions
• LDAP / AD Sync for seamless user management
• Full user authentication via ID cards, smartphones, mobile app, network credentials, Google account, and PIN
• Enforces multiple methods of authentication for high security applications - for example, ID card & PIN
• Permission based access to MFP services and apps - print, copy, scan & fax
• Control user access to color for print & copy
• Allow users to self-register ID cards
• User credentials fully encrypted through SSL and Kerberos
• Authentication via Mobile App using QR-code or NFC (<i>dependent on device</i>)

SECURE PRINT RELEASE / PULL PRINTING
• Embedded app currently available for OKI sXP, Ricoh ESA, Sharp OSA, Toshiba e-BRIDGE & Xerox EIP MFPs
• Embedded support for Canon, HP, Konica Minolta, Kyocera HyPAS, Lexmark & Samsung MFPs coming 2016
• Release print jobs at non-embedded MFPs and printers via ID cards or Mobile app
• Supports delegate printing - allow users to release print jobs on behalf of others
• Change print job attributes via Embedded app - for example convert color jobs to mono, simplex to duplex

SECURE PRINT RELEASE / PULL PRINTING

- Configurable options to purge held print jobs - or example, delete all print jobs not released daily, weekly, or monthly
- Retain any print job held in myQueue when released
- Allows users to print directly to network printers & MFPs using PIN release

MOBILE & GUEST PRINTING

- Allows user to print from ANY mobile device to ANY network print device
- Mobile apps available for iOS and Android devices
- Allow users to self-register multiple mobile devices such as smartphones and tablets
- Supports AirPrint and Google CloudPrint
- Submit documents for printing by mobile app, email, or secure webpage upload
- Configurable email confirmations for all mobile print jobs
- Print a wide range of document formats, including Microsoft Office documents
- View and release print jobs in myQueue on ANY print device from mobile apps
- Supports Guest printing and hospitality hotspot printing

COST RECOVERY

- Create pricing models by Client, by Project, by Department, etc.
- Easily export billing data as CSV, XML or in Microsoft Excel format
- Assign print, copy, scan and fax usage to specific Clients, Projects, Departments etc.
- Allow users to allocate all MFP and printer usage to multiple accounts
- Create different pricing models by device type, usage type, or specific page attribute
- Select cost codes directly at the MFP

GENERAL

- Browser-based Admin UI accessible from any mobile device
- Browser-based Admin UI accessible from any mobile device
- Automatically configure MFPs from within ROI Print Manager
- Tracks, manages & controls user printing from any platform to any print device
- Output management server at the core - eliminates the need for Windows and other print servers
- Scale solution for small and medium sized organizations to multi-national corporations
- High availability architecture

INTEGRATIONS

- Provides user level print data synchronized with device data directly into ECi FMAudit (www.fmaudit.com)
- Integrates with DOC Assess (www.docassess.com) for floor plan mapping and TCO
